

I listen to my xm radio every single day and bring it to work with me and I bring it in because the shitty DXM satellite sucks(I work in the food industry) and I have a regular radio in the kitchen-that sounds bad. CD's are cool but I like, for instance, the classic alternative Lucy station that plays songs I grew up listening to. And it is very cool that I can even check the weather without looking at the tv telling me about tornados that are happening 50 miles north of me, I can see in a nutshell if I need to worry what is going on right in my town. YOU FCC PEOPLE WHOEVER YOU ARE ARE ABOUT AS FUCKED UP AS A SOUP SANDWICH!!!!Last time I noticed I thought we were living in a free country.
